PLENTY OF FRESH A

Cool, Comfortable Kitchens

NOW—every kitchen can be cool and comfortable at all times—even in warmest weather. With modern home ventilators, it's such a simple matter to banish excessive heat, grease-laden smoke and unpleasant fumes caused by cooking and baking, and to keep the kitchen atmosphere delightfully fresh and inviting.

Put an Emerson Ventilating Fan in the kitchen—and note the difference. The atmosphere is immediately changed and refreshed. The super-heated air condition resulting from cooking and baking disappears. Grease-laden smoke, cooking odors and fumes are quickly drawn outside and a purer, cleaner atmosphere in the entire home results.

An Emerson Ventilator in the kitchen assures proper ventilation; it removes un-

AIR IN THE HOME

healthful steam, dead air and smoke . . . prevents kitchen odors from permeating the living rooms and annoying guests and embarrassing the hostess.

Economy—Curtains, drapes and furnishings stay clean longer with proper ventilation in the home. A saving in cleaner's bill. Less house-cleaning . . less refurnishing . . less expense.
